

Color Guide - Polyvinylidene Fluoride (PVDF)

Canam Steel Building Corporation is pleased to offer premium, highly durable Polyvinylidene Fluoride (PVDF) coatings; the most advanced available in the industry today. This high performance coating is designed to meet the most stringent specifications for cool roofs. All offer high solar reflectivity, exceptional color stability, chalk resistance, durability and more. PVDF coatings are preferred by many architects and specifiers when maximum color retention is critical. All standard Polyvinylidene Fluoride colors shown on this card feature a 30 year finish warranty. Request a sample Warranty for specific warranty information.
